

Google Certificates

Jan 2022- Mar 2022

MG MWERX and AUix partnered with Google Coursera to offer up to 500 certificates free of charge to pre-selected AU military and civilian personnel. Certifications are available in IT Support, Data Analytics, UX Design, and Project Management. Coursera offers world-class training and development and on-line certificate programs. Eighty-two percent of Google Professional Certificate participants in the U.S. report a positive career outcome such as a new job/position, enhanced expertise, promotion, or raise within 6 months of completion. MG MWERX will test the certificate program to a small control group in late January to ensure proper user functionality, integration, and experience before offering to a wider AU student, faculty, and permanent party assignment population.

Event Outcomes

- ✓ Completed Google/MG MWERX collaborative website
- % Conducting a 10% test group study to assess functionality and capabilities
- % Community College of the Air Force is interested in participating
